Table of Contents

1. Executive Summary
2. EU AI Act Overview
3. Risk-Based Classification
4. Implementation Timeline
5. Compliance Checklist
6. Gap Analysis Framework
7. Organizational Requirements

1. Executive Summary

The EU AI Act is the world's first comprehensive AI regulation, establishing requirements for organizations developing, deploying, or using AI systems in the EU. Compliance is mandatory from 2025-2026 depending on risk classification. This tracker helps organizations map their systems, identify gaps, and build compliance roadmaps.

2. EU AI Act Overview

Key Dates

April 2025: Prohibitions on harmful AI practices take effect **February 2026:** High-risk and general requirements take effect **August 2026:** Governance, documentation, and transparency requirements

Scope

Applies to organizations developing or deploying AI systems within the EU, or whose AI systems affect EU residents. Includes both EU and non-EU organizations.

3. Risk-Based Classification

Prohibited AI (Banned)

- Subliminal manipulation techniques
- Biometric identification for mass surveillance
- Social scoring systems
- Misuse of biometric data

High-Risk AI

- Recruitment and employment decisions
- Loan/credit decisions
- Biometric identification systems
- Critical infrastructure management
- Law enforcement activities
- Migration and border control
- Education and vocational training

Limited Risk (Transparency)

Chatbots and interactive systems where users may not realize they're interacting with AI

Minimal/No Risk

Systems with low potential impact on fundamental rights

4. Implementation Timeline

Phase	Timeframe	Key Activities	Owner
Assessment	Now - Dec 2024	Map AI systems, classify risk levels, identify gaps	Chief Compliance Officer
Design	Jan - Jun 2025	Document processes, build controls, train teams	CTO/Chief Risk Officer
Implementation	Jul 2025 - Jan 2026	Deploy controls, conduct testing, remediate gaps	Implementation Lead
Compliance	Feb 2026+	Maintain compliance, monitor changes, audit readiness	Compliance Office

5. Compliance Checklist

For All AI Systems

- Documented purpose and intended use
- Documented training data and methodology
- Documentation of performance metrics
- Documentation of limitations and risks
- User transparency documentation (where required)
- Incident reporting procedures
- Accessibility compliance (WCAG 2.1)

For High-Risk Systems

- Risk assessment and management system
- Data governance and quality procedures
- Bias monitoring and mitigation
- Human oversight and review procedures
- Logging and documentation systems
- Performance monitoring systems
- Regular audit and conformity assessment
- Cybersecurity and robustness testing

6. Gap Analysis Framework

Gap Assessment Template

AI System	Risk Level	Requirement	Current State	Gap	Remediation	Timeline	Owner
Lending Decision AI	High	Human oversight	None	No human review	Implement review queue	6 months	Chief Risk Officer
Recruitment AI	High	Bias testing	Partial	Testing on 2 of 5 attributes	Comprehensive testing	3 months	HR Lead

7. Organizational Requirements

Governance Structure

Data Protection Officer (DPO): May overlap with AI compliance role **AI Compliance Officer:** Dedicated role for high-risk deployments **Technical Team:** Data scientists, engineers for implementation

Documentation Requirements

- AI system design and development documentation
- Training data documentation and lineage
- Performance metrics and benchmarks
- Risk assessment and mitigation plans
- User instructions and warnings
- Incident logs and corrective actions
- Audit trails (1 year minimum)

Next Steps

This guide is designed to be a practical, hands-on resource for implementation. Use the templates and checklists as starting points for your organization's specific needs.

We're here to help.
