Table of Contents

1. Executive Summary
2. Prioritization Framework
3. Evaluation Criteria
4. Scoring Methodology
5. Use Case Portfolio
6. Prioritization Example
7. Implementation Roadmap

1. Executive Summary

Organizations typically identify 50-100 potential GenAI use cases but have resources to implement only a few. This matrix provides a systematic approach to evaluate, score, and prioritize use cases based on business value, feasibility, and strategic fit.

2. Prioritization Framework

Use cases are scored across 4 primary dimensions: 1. **Business Value (40%)**: Financial impact and strategic importance 2. **Feasibility (25%)**: Technical complexity and implementation risk 3. **Data Readiness (20%)**: Availability and quality of required data 4. **Strategic Fit (15%)**: Alignment with organizational priorities

3. Evaluation Criteria

Business Value (40%)

Score	Financial Impact	ROI Timeline	Customer Impact
5 (Excellent)	>\$10M/year	<12 months	High satisfaction, brand enhancing
4 (Good)	\$3-10M/year	12-18 months	Moderate satisfaction improvement
3 (Fair)	\$1-3M/year	18-24 months	Incremental improvement
2 (Poor)	\$100K-1M/year	>24 months	Minimal impact
1 (Minimal)	<\$100K/year	Unknown	No direct impact

Feasibility (25%)

Score	Technical Complexity	Resource Needs	Timeline
5 (Easy)	Low, existing models	Small team, <\$250K	3-4 months
4 (Moderate)	Medium, some customization	Team + specialists, \$250-500K	6 months
3 (Challenging)	High, significant customization	Large team, \$500K-1M	9 months

2 (Complex)	Very high, new approaches needed	Specialized team, \$1-2M	12-15 months
1 (Infeasible)	Extremely complex or impossible	Major resources	>18 months

4. Scoring Methodology

Overall Score Calculation

Overall Score = (BV Score × 0.40) + (Feasibility Score × 0.25) + (Data Readiness Score × 0.20) + (Strategic Fit Score × 0.15)

Interpretation: • Score 4.5-5.0: Implement immediately (Quick wins) • Score 3.5-4.4: Implement in Phase 2 (High value, feasible) • Score 2.5-3.4: Plan for Phase 3 (Good opportunities, higher effort) • Score <2.5: Defer or reject (Lower priority)

5. Use Case Portfolio

Sample Use Cases to Evaluate

Use Case	Business Function	Gen AI Type
Customer service chatbot	Customer Service	Conversational AI
Document summarization	Legal/Compliance	Text analysis
Code generation assistance	Development	Programming AI
Content generation	Marketing	Text generation
Customer insights extraction	Analytics	Data intelligence
Interview transcription	HR	Audio processing

6. Prioritization Example

Sample Scoring: Customer Service Chatbot

Dimension	Score	Rationale	Weighted Score
Business Value	5	\$5M annual savings + improved CSAT	2.0

Feasibility	4	Proven models, 6-month timeline	1.0
Data Readiness	4	Chat history available, good quality	0.8
Strategic Fit	5	Customer experience priority	0.75
TOTAL SCORE			4.55

Prioritization Matrix

Plot all use cases on a 2x2 matrix: X-axis: Feasibility (Easy → Difficult) Y-axis: Business Value (Low → High)

Quick Wins (High Value, Easy): Implement first **Strategic Initiatives (High Value, Difficult):** Plan for Phase

2 **Easy Wins (Low Value, Easy):** Implement if resources available **Difficult/Low Value:** Defer or reject

7. Implementation Roadmap

Phase 1: Quick Wins (Months 1-3)

- Focus on 2-3 use cases scoring 4.0+
- Build quick prototypes, prove business case
- Generate quick ROI and momentum
- Establish processes and governance

Phase 2: Strategic Initiatives (Months 4-9)

- Scale Phase 1 use cases
- Implement 3-5 medium complexity use cases
- Build organizational capability
- Develop competitive advantages

Phase 3: Transformation (Months 10-18)

- Execute complex, high-value initiatives
- Expand to adjacent use cases
- Become AI-first organization
- Achieve sustainable competitive advantage

Next Steps

This guide is designed to be a practical, hands-on resource for implementation. Use the templates and checklists as starting points for your organization's specific needs.
