

Enterprise AI Adoption Blueprint

6-Week Programme Summary

Enterprise.AI | SCALE · GOVERN · UNLOCK

The Problem

Most enterprises invest in AI platforms but struggle with adoption. Employees revert to old workflows within weeks. Value leaks.

6-Phase Programme (6 Weeks)

Week 1	Discovery & Baseline Current-state audit, persona mapping, tool inventory
Week 2	Use-Case Prioritisation Impact/effort scoring, quick-win identification
Week 3	Workflow Redesign Process re-engineering with AI co-pilots embedded
Week 4	Enablement & Training Role-based training, prompt libraries, playbooks
Week 5	Pilot & Measure Controlled rollout, KPI tracking, feedback loops
Week 6	Scale & Sustain Champions network, governance guardrails, roadmap

7 Deliverables

1. AI Adoption Maturity Scorecard (baseline + target)
2. Prioritised Use-Case Portfolio (ranked by ROI)
3. Redesigned Workflows (3-5 high-impact processes)
4. Role-Based Training Programme & Prompt Library
5. Pilot Results Dashboard with KPIs
6. Champions Network & Governance Playbook
7. 12-Month Scale Roadmap with Quick Wins

Why Now

- Anthropic, Google, and Microsoft are shipping enterprise AI weekly
- Competitors are 6-12 months ahead on adoption curves
- Vision 2030 mandates digital transformation acceleration
- Talent expects AI-augmented workflows — retention risk otherwise

Ready to accelerate adoption?

30-minute discovery call to scope your 6-week sprint
